

Lab 3

[Re-submit Assignment](#)

Due Mar 21 by 11:59pm **Points** 10 **Submitting** a file upload

Follow the prompt on Frank's site for Lab 3: <https://sites.google.com/site/sjsucmpe126/labs-and-homeworks/lab-3>
(<https://sites.google.com/site/sjsucmpe126/labs-and-homeworks/lab-3>)

You should complete all the tasks in the "overview" section.

Include the following in your submission:

1. All cpp and h files used
2. Console output either as a comment in main or as a screenshot demonstrating all the functionalities required from the assignment.

If you do not include the console output in the first submission, it is an automatic -2 with no opportunity to earn those two points back. The output must be included within the files submitted and not as a side comment on Canvas.
